SUMMARY

Computer Science undergraduate (B.Tech, 2027) who ships full-stack applications with security built in from the first commit. Delivered **4 production security tools in 30 days** during a cyber security internship at Thiranex, spanning FastAPI backends, Node.js/Express authentication, and Scikit-learn threat detection. Seeking a **Software Engineering internship**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, C/C++, HTML5, CSS3

Frontend: DOM Manipulation, CSS Grid/Flexbox, Responsive Design, Bootstrap, EJS

Backend & APIs: Node.js, Express, FastAPI, REST APIs, WebSockets, Pydantic, SQLite

Security: Bcrypt, TOTP 2FA, Helmet, Rate Limiting, Parameterized Queries, Input Validation, Vulnerability Assessment, Scapy

ML & Data: Scikit-learn, pandas, NumPy, Random Forest, Isolation Forest, TF-IDF

Tools & DevOps: Git, GitHub Actions (CI/CD), Docker, docker-compose, pytest, Linux CLI, VS Code

PROFESSIONAL EXPERIENCE

Cyber Security Intern, Thiranex

Jun 2026 — Jul 2026

- Delivered **4 production security applications in 30 days** during an intensive virtual internship, earning official Thiranex certification
- Architected and shipped tools spanning file compression, ML-based threat detection, port scanning, and password analysis
- File Compression App** — Reduced file sizes by up to **60%** via a FastAPI backend with drag-and-drop UI and real-time entropy analytics
- Phishing Detection Model** — Built a Scikit-learn classifier reaching **92% accuracy** on a 1,200-sample benchmark dataset
- Vulnerability Scanner** — Automated scanning of **1,000+ ports** per host, flagging weak configs and outdated software versions
- Password Analyzer** — Real-time entropy scoring with a visual strength meter, evaluating **5+ complexity factors** per input

PROJECTS

Real-Time Intrusion Detection Dashboard

github.com/abhay528/INTRUSION-DETECTION-SYSTEM

Python · FastAPI · Scapy · Scikit-learn · WebSockets · Docker

- Engineered a real-time network security dashboard processing **500+ events/sec** through a WebSocket event pipeline with REST API integration
- Trained a Random Forest, Isolation Forest, and deep neural network ensemble over **41 statistical flow features** to classify **5 attack categories**
- Reduced threat alert latency to **<100ms** across **4 monitoring panels** using async WebSocket listeners with priority-based event queuing

Secure Authentication System

github.com/abhay528/secure-login-system

Node.js · Express · SQLite · Bcrypt · TOTP 2FA · Helmet

- Implemented **Bcrypt hashing with 12-round salt** generation, raising modelled password crack time to **10+ years** against brute-force attacks
- Eliminated SQL injection vectors using **parameterized queries** (better-sqlite3) and multi-layer validation with express-validator across all endpoints
- Integrated **TOTP-based 2-factor authentication** (speakeasy) with **30-minute** idle session expiry, hardened using Helmet and express-rate-limit

EDUCATION

B.Tech in Computer Science Engineering

Aug 2023 — Jun 2027

Amity University, Madhya Pradesh, Gwalior — CGPA: 7.3/10

Senior Secondary (XII) — CBSE

2022

PCM + Computer Science

Secondary (X) — CBSE

2020

CERTIFICATIONS

Cyber Security Job Simulation, Deloitte Australia (via Forage)

Jun 2026

Cyber Engineering certification — threat landscape analysis across 3 domains: network, application, identity

Cyber Security Internship Certification, Thiranex

Jul 2026
